

HIGH LOAD PERMIT APPLICATION

A High Load Permit is required to be completed for all loads travelling through the Network that will exceed 4.25m in overall height.

Some loads will require an escort and may require power to be disconnected to customers. You should submit an application a minimum of 14 days prior to the planned moving date to allow sufficient time to assess the requirements of the application. Once the application has been processed a permit can be issued along with any specific conditions.

Any damages to the Network regardless of this permit will be chargeable to the Removal Company listed below.
