# Explanation of price changes

The April 2023 price changes represent the balancing required to ensure affordability for our customers, provide an adequate return to the company, ensure TLC is compliant with our regulatory requirements under the Electricity Distribution Services Default Price-Quality Path Determination 2020 and continue our long-term pricing strategy – for prices to gradually reflect the underlying cost structure of the business.

We continue to fund our renewal programme focusing on safety, reliability, affordability, decarbonisation and industrialisation, and innovation.

Of note:

- TLC has not made any changes to the structure of our time-of-use pricing plans.
- TLC has reallocated transmission costs to reflect the new Transmission Pricing Methodology, effective 1 April 2023.
- TLC has withdrawn some prices as they were applicable when TLC direct billed all of our customers.
- For clarity, TLC has replicated fees for Distributed Generation from the Electricity Industry Participation Code 2010.
