1. INTRODUCTION

This document contains information required to be disclosed under clause 7 of the Commerce Act (Electricity Distribution Thresholds) Notice 2004. Notice 2004 ("the Notice") as amended by the Commerce Act (Electricity Distribution Thresholds) Amendment Notice 2006 (("the Amendment Notice 2006") and as extended by the Commerce Act (Electricity Distribution Thresholds) Amendment Notice 2009 ("the Amendment Notice 2009").

2. PRICE PATH THRESHOLD COMPLIANCE STATEMENT

The Lines Company Limited (TLC) does comply with the price path threshold requirements of clause 8.5.

(1) To comply with the requirements of clause 8.4 the notional revenue as at 31 March 2011 is not to exceed the allowable notional revenue in accordance with the formula:

<u>NR</u>, ≤1

NR_t is the notional revenue for the assessment period ending in March 2011 being equal to: $\sum P_{i,t} Q_{i,t-2} - K_{i,t}$

For TLC this is:

 $\Sigma P_{2011}Q_{009}$ Revenue: 29,929,538

 K_{2011} Pass Through Costs: (5,469,238)

Notional Revenue \$24,460,300

And $R_t = \sum P_{i+1} Q_{i+2} - K_{i+1} (1 + \Delta CPI_t)(1 - X)$

For TLC this is:

 $\Sigma P_{2010}Q_{009}$ Revenue: 30,285,036

 K_{2010} Pass Through Costs: (5,234,068)

\$25,050,968

 Δ **C**Pl₂₀₁₁ CPI change 2.47%

X Factor 0.00%

Allowable Notional Revenue \$25,668,484

Result:

As the notional revenue as at 31 March 2011 is less than the allowable notional revenue, The Lines Company Limited is compliant with this arm of the threshold.

(2) To comply with the requirements of clause 8.4 the notional revenue at anytime during the period is not to exceed the greater of the allowable notional revenue at the end of the assessment period and the allowable notional revenue at the previous assessment date.

For TLC this is:

Highest allowable notional revenue (see above): \$25,668,484

Notional revenue 1 April 2010 to 31 March 2011 \$24,460,300

Result:

The notional revenue at all times is below the highest allowable notional revenue. TLC is therefore compliant with this arm of the threshold.

Overall

The Lines Company Limited is COMPLIANT with the Price Threshold.

3. QUALITY THRESHOLD

The Lines Company Limited confirms that it complies with the quality threshold requirements of clauses 9.1 (a) and (b).

Clause 9.1 (a) requires that the SAIDI for the 12 month period ending 31 March 2011 is not to exceed the five year average SAIDI to 31 March 2009.

2011 SAIDI 260.350 5 year average SAIDI 307.673

The Lines Company Limited is COMPLIANT with this requirement.

Clause 9.1 (b) requires that the SAIFI for the 12 month period ending 31 March 2011 is not to exceed the five year average SAIFI to 31 March 2009

2011 SAIFI 3.474 5 year average SAIFI 4.177

The Lines Company Limited is COMPLIANT with this requirement.

Policies and Procedures for Recording SAIDI and SAIFI

As required under the Commerce Act (Electricity Distribution Services Input Methodologies) Determination 2010 the following explanation is provided on the procedures and polices used for recording the SAIDI and SAIFI statistics for the assessment period.

All asset data has been sourced from the asset information system (BASIX). Further information on this system is included in the Asset Management Plan (AMP).

The assessment dataset was normalised in accordance with Schedule 3 of Decision 685.

Reliability

The reference dataset was prepared in accordance with the terms set out in Decision 685 (Electricity distribution default price-quality path determination pursuant to Part 4 of the Commerce Act 1986 (the Act). The reliability figures have been calculated as per Schedule 3, Reliability Limits and Assessed Values. The calculations were programmed into TLC's asset database, an asset system supplied by EMS Solutions Pty Ltd (Basix Asset Management Database). The outage information is taken from the control room logs and loaded into Basix. Reconciliations are undertaken between the control room log and Basix to ensure data is correctly entered. Customer numbers are updated daily from the billing system (Gentrack).

Procedures

- The Control Room operators record all outages that occur on the TLC network. These include 33 kV, 11 kV and Low Voltage (LV). These are then input into the outage reporting system of Basix.
- The input data includes each outage, cause of outage, duration of outage and the number of customers
 affected
- The Gentrack billing system holds the customer information and any changes, (i.e. account name, billing address, demand) are automatically transferred and updated into Basix as part of the night moves. In the Gentrack system each customer is allocated an ICP, and each ICP is allocated to a transformer.
- The Basix outage calculator accesses this information to get the total number of customers that are
 affected by an outage. It counts the number of ICP's per transformer affected by an outage and
 multiplies this by the length of the outage. The calculator gives an actual figure for each outage and a
 normalised figure as per Schedule 3, Reliability Limits and assessed values.
- After the calculations are completed, reconciliation is undertaken to ensure the correct data has been
 inputed into Basix from the control room log.

Policies

- Data is collected and analysed in compliance with the Electricity Distribution (Information Disclosure)
 Requirements 2008 and the 2003 Reliability Plan.
- All outages are reviewed on a monthly basis. Figures are compared with the AMP (Asset Management Plan), and threshold targets are reported to the Board.

Assumptions and Explanatory Notes

Interruptions

LV Outages

All outages that may have originated in the LV system and cause the High Voltage (HV) protection to operate have been included.

Single Phase Faults

TLC has included all HV single phase faults because of the practical difficulties associated with excluding them. For example, 3 phase line fuses typically supply a combination of 3 phase and 2 phase lines. All transformers connected to the TLC network have "delta" windings on the primary. The loss of one fuse of a set of three results in varying levels of voltages. The definition of interruption in the Electricity Distribution (Information Disclosure) Requirements 2008 gives no guidance on how these situations should be included in statistics.

Private Lines

TLC figures exclude the impact of private responsibility works and installations.

TLC's figures are based on maintaining the supply to the "Point of Connection" as defined in its Terms and Conditions of supply. (Further independent information on the "Point of Connection" and "Point of Supply" and the demarcation between private responsibility lines and network lines is available from the Electricity Authority website).

In TLC's case there are about 800km of private responsibility lines connected to the network.

Decision 685 and Threshold Compliance

In late November 2009, the Commerce Commission released Decision 685, which sets thresholds for quality for the period 1st April 2010 to 31st March 2015. These limits are below TLC's present targets that have been based on customers' quality requirements.

Compliance will both be difficult and add cost to renewals. It has been agreed by stakeholders that the lowest cost approach to renewals should be taken. TLC plans to apply for a Customised Quality Path (CQP) in accordance with s 53Q of the Act.

MP1 and MP3 Load Forecasting

TLC's AMP (Asset Management Plan) has detailed information on TLC's load forecasting, methodology and assumptions made.

These assumptions include allowances for a slow down in economic activity, demand side management and likely distributed generation connections.

Overail

The Lines Company Limited is COMPLIANT with the Quality Threshold.

4 EVIDENCE OF PRICE THRESHOLD

Quantity Adjustment

Pursuant to clause 8.6, which concerns price restructuring, TLC has not restructured its tariff.

^{*\$60.00} per request**

^{**} Charged (on top of charges) if no contact is made by customer prior to 2 working days before disconnection. Further charges of \$15 per 10 minute blocks apply if staff member is onsite and required to wait whilst customer contacts The Lines Company for extension of payment.

5 EVIDENCE OF COMPLIANCE WITH QUALITY THRESHOLD

The following information confirms the lines business' compliance and includes evidence to this effect in the form of SAIDI and SAIFI figures, Reliability Limits and Assessed Value for the

Table 1 below illustrates SAIDI and SAIFI figures for the five years ending March 31st 2009. The data from these years was used as per the Act to calculate the normalised targets to find the reliability limit. The 2011 figures are for the full 12 months.

	2005	2006	2007	2008	2009	2011	Reliabilty Limits
SAIDI Actual	305.6	284.9	368.5	267.31	297.13	292.431	
SAIDI Normalised						260.350	307.673
SAIFI Actual	4.02	3.84	3.63	3.68	4.77	3.474	
SAIFI Normalised						3.474	4.18

Table 1: SAIDI and SAIFI Data.

As the 2011 figures are below the reliability limits, compliance has been achieved.

DIRECTORS' CERTIFICATE ON THRESHOLD COMPLIANCE STATEMENT

We, Arthur Patrick Muldoon and, and Peter Milton Donald Browne, Directors of The Lines Company Limited, certify that, having made all reasonable inquiry, to the best of our knowledge and belief, the attached threshold compliance statement of The Lines Company Limited, and related information, prepared for the purposes of the Commerce Act (Electricity Distribution Thresholds) Notice 2004 complies with the requirements of that notice.

INDEPENDENT AUDITOR'S REPORT

TO THE READERS OF THE ANNUAL COMPLIANCE STATEMENT OF THE LINES COMPANY LIMITED FOR THE ASSESSMENT PERIOD ENDED ON 31 MARCH 2011

The Auditor-General is the auditor of The Lines Company Limited (the company). The Auditor-General has appointed me, Bruno Dente, using the staff and resources of Deloitte, to provide an opinion, on her behalf, on the company's Annual Compliance Statement for the assessment period ended on 31 March 2011 on pages 3 to 17 regarding compliance with the Commerce Act (Electricity Distribution Default Price-Quality Path) Determination 2010.

We have audited the Annual Compliance Statement in respect of the default price-quality path prepared by the company for the assessment period ended on 31 March 2011 and dated 12 July 2011 for the purposes of clause 11 of the Commerce Act (Electricity Distribution Default Price-Quality Path) Determination 2010 ("the Determination").

Directors' Responsibilities

The Directors of the company are responsible for the preparation of the Annual Compliance Statement in accordance with the Determination and for such internal control as the Directors determine is necessary to enable the preparation of an Annual Compliance Statement that is free from material misstatement, whether due to fraud or error.

Auditor's Responsibilities

Our responsibility is to express an opinion on the Annual Compliance Statement based on our audit. We conducted our audit in accordance with the International Standards on Auditing, International Standards on Auditing (New Zealand) and the New Zealand Institute of Chartered Accountants Standard on Assurance Engagements 3100: Compliance Engagements. This standard requires that we comply with ethical and quality control requirements and plan and perform the audit to obtain reasonable assurance about whether the Annual Compliance Statement has been prepared in accordance with the Determination and is free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the Annual Compliance Statement. The procedures selected depend on the auditor's judgement, including the assessment of the risks of material misstatement of the Annual Compliance Statement, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation of the Annual Compliance Statement in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control.

In relation to the price path set out in clause 8 of the Determination, our audit included examination, on a test basis, of evidence relevant to the amounts and disclosures contained on pages 3 to 17 of the Annual Compliance Statement.

In relation to the SAIDI and SAIFI statistics for the Reference Period and the Assessment Period ended on 31 March 2011, including the calculation of the Reliability Limits and the Assessed Values, which are relevant to the quality standards set out in clause 9 of the Determination, our audit included examination, on a test basis, of evidence relevant to the amounts and disclosures contained on pages 3 to 17 of the Annual Compliance Statement.

Our audit also included assessment of the significant estimates and judgments, if any, made by the company in the preparation of the Annual Compliance Statement and whether adequate information has been disclosed in accordance with clause 11.1(b) of the Determination.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Limitations and Use of this Independent Auditor's Report

This independent auditor's report has been prepared solely for the Directors of The Lines Company Limited and the Commissioners of the New Zealand Commerce Commission in accordance with the Determination. We disclaim any assumption of responsibility for any reliance on this report to any persons or users other than the Directors of The Lines Company Limited and the Commissioners, or for any purpose other than that for which it was prepared.

Because of the inherent limitations in evidence gathering procedures, it is possible that fraud, error or non-compliance may occur and not be detected. As the procedures performed for this engagement are not performed continuously throughout the assessment period and the procedures performed in respect of the company's compliance with the Determination are undertaken on a test basis, our engagement cannot be relied on to detect all instances where the company may not have complied with the Determination. Our opinion has been formed on the above basis.

Independence

We have no relationship with or interests in the company other than in our capacity as auditor.

Opinion

In our opinion, the Annual Compliance Statement of The Lines Company Limited for the Assessment Period ended on 31 March 2011, has been prepared, in all material respects, in accordance with the Determination.

Our audit was completed on 12 July 2011 and our opinion is expressed as at that date.

Bruno Dente Deloitte

On behalf of the Auditor-General

Hamilton, New Zealand

This audit report relates to the electronic publication of the annual compliance statement prepared under the Commerce Act (Electricity Distribution Default Price-Quality Path) Determination 2010 (the "annual compliance statement") of The Lines Company Limited (the company) for the assessment period ended on 31 March 2011.

We have not been engaged to report on the integrity of any website on which the annual compliance statement has been published. We accept no responsibility for any changes that may have occurred to the annual compliance statement since it was initially approved and published.

This audit report refers only to the annual compliance statement named above. If readers of this audit report are concerned with the inherent risks arising from electronic data communication they should refer to the original published hard copy of the annual compliance statement and related audit report dated 12 July 2011 to confirm the information included in the annual compliance statement published on this website.

Legislation in New Zealand governing the preparation and dissemination of financial information may differ from legislation in other jurisdictions.
